Outbound Logistics Health Check

Health Check Overview

Outbound logistics, often termed distribution, is a crucial part of any company's business. It is normally one of the first means of communicating with customers and presents a vital first hand image of your Company. Because a company will often have a number of different departments and operating centres, each with their own distribution requirements, there can be duplicated effort and a lack of synergy to the corporate requirements e.g. failing to capitalise on volume related discounts, exploring or coordinating alternative means of distribution, sub optimal Quality of Service (Q of S) achievement, plus much, much more.

OPS Logistics Consultancy Ltd (OPS) will provide an experienced consultant to review your company's outbound logistics operation. They will compare your company's current modus operandi against your business requirement, industry standards and provide suggestions for alternative methodologies.

At the end of the Health Check, a high-level report will be produced covering:

- Executive Summary
- List of source information
- List of assumptions and risks
- Overview of current operational methodologies
- Comparison against industry standards
- Best-in-Class operational practices
- Areas for improvement
- Alternative methodologies
- Potential savings

Health Check Benefits

The Company's management may have a fragmented or at best a single view of their outbound logistics operation and cost. By utilising our industry specific expertise, examining a coordinated business requirement and benchmarking current options, the information provided will enable management to make quantitative intelligent and informed decisions on the way forward.

Prerequisites of Health Check

To ensure a meaningful report within such a confined period of time (Two days), there are a number of things the customer will need to provide before the start of the engagement:

- Distribution records, e.g. volumes, and customer fall to ground % spread
- Areas of operation, e.g. UK, International, both, etc.
- Product types, weight and sizes
- Current carrier details and costs
- Sample invoice records
- Delivery profile offered B2B, B2C, etc.
- Delivery criteria required, flexible, next day only, signed for service, etc.
- Q of S criteria required versus that currently achieved.

Price

A fixed cost of £1,200, excluding VAT and expenses. This provides for no hidden surprises.
